Subject

Document review for scooter Mini crosser M2 4W and M2 3W

Dear Mr. Smedegaard,

As requested by Medema Production A/S, TÜV Rheinland Nederland B.V. has carried out a document review to upgrade the electrically powered scooters type Mini crosser M2 4W and M2 3W to the EN 12184:2014.

We performed this year a type test at the electrically powered scooters type Mini crosser M2 4W and M2 3W according to the European Standard FprEN 12184:2012.

The electrically powered scooters, trademark: Medema, type: M2 4W and M2 3W have already been tested to the requirements of the EN 12184:1999. Therefore the M2 4W scooter is only tested to the changes between the FprEN 12184:2012 and the EN 12184:1999.

See for the M2 4W test results, of the EN 12184:1999, report Hi 08/0163 /2.

See for the M2 3W test results, of the EN 12184:1999, report Hi 08/0163 /1.

The tests have been performed in order to judge whether or not the scooters meet the applicable requirements of the European Standard EN 12184:2014 for Class C.

Properties and test methods	Requirement	Results
European Standard EN 12184:2014, Electrically powered wheelchairs, scooters and their chargers - Requirements and test methods	Type test	Pass

Reference	Date of issue
TRN-Report 89205415.02	May 7, 2014
TRN Certificates M2 4W and M2 3W Nr. PL 4601354.010 & PL 4601354.011	May 23, 2014

With kind regards,

H. Fokkenrood
